

Emerging Directions in Deep Learning

Lab 4 - *PyTorch Geometric* - Applications

Mihai-Sorin Stupariu

The aim of the lab is to further practice the *PyTorch Geometric package*. The reference paper is [Fey & Lenssen, 2019](#).

The tasks of the lab can be found below. **Please send a single PDF file with the solutions on the individual chat of MSTeams. The file will include screenshots with the solutions (or the notebook you ran) and, where required, brief explanations.**

Deadline: **Wednesday, 22.04.2026, 12:00.**

1. **(2p)** Choose one of the notebooks from the PyTorch Geometric documentation [Colab Notebooks - pytorch-geometric 1.7.0 documentation \(pytorch-geometric.readthedocs.io\)](#) except notebooks 1 and 2 (already solved in Lab 3).
2. **(max. 4p)** Make changes (at a conceptual level) to this tutorial and report the outcomes or solve the exercises at the end of the notebook (if proposed). Explain the changes in the documentation.
3. **(6p)** Presentation of the solution in the lab session (f2f, @PBT)
OR
(4p) Presentation of the solution online (no later than Wednesday, 22.04.2026, 21:00).
