

Emerging Directions in Deep Learning

Lab 5 - *PyTorch Geometric* - Applications

Mihai-Sorin Stupariu

The aim of the lab is to further practice the [PyTorch Geometric package](#). The reference paper is [Fey & Lenssen, 2019](#).

The tasks of the lab can be found below. **Please send a single PDF file with the solutions on the individual chat of MSTEams. The file will include screenshots with the solutions (or the notebook you ran) and, where required, brief explanations.**

Deadline: **Monday, 11.05.2026, 12:00.**

The tasks refer to the tutorials on [Design of Graph Neural Networks](#).

1. **(6p)** Make a brief presentation of the tutorials (aim, relevant references, key elements - without code, only description).
2. **(6p)** Run the code or solve the exercises at the end of the notebook (if proposed). Explain the results / solutions in the documentation.

For solutions sent in advance:

(4p) (Partial) solution sent during the lab.

OR

(2p) (Partial) solution sent until **Friday, 08.05.2026, 20:00.**
